ABOUT US

We are a complete automatic door service, including the manufacture, design, installation, maintenance, and repairs of automatic doors. Our service expands nationwide across the UK with our fully trained engineers being available 24/7 for emergency situations. Alongside our main line of work, we also offer bespoke services and packages to suit every budget.

CONTENTS

OUR PRODUCTS & SERVICES

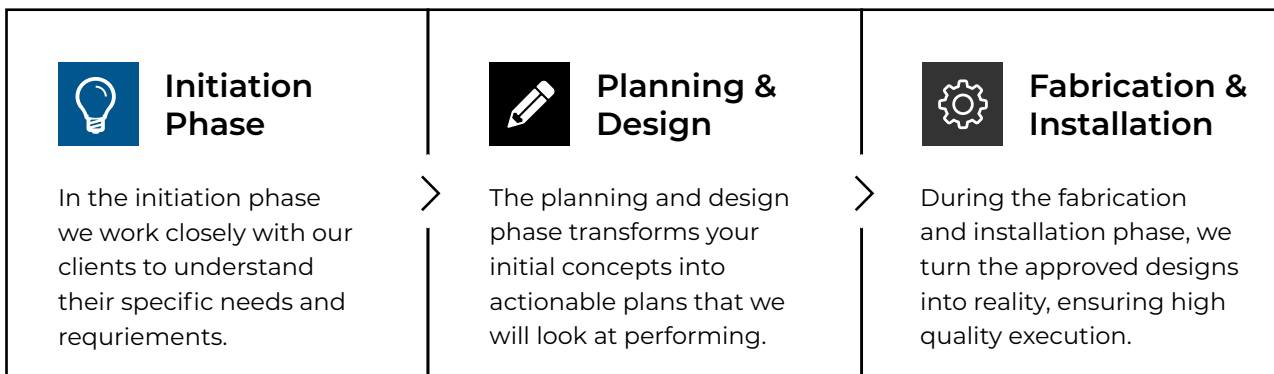

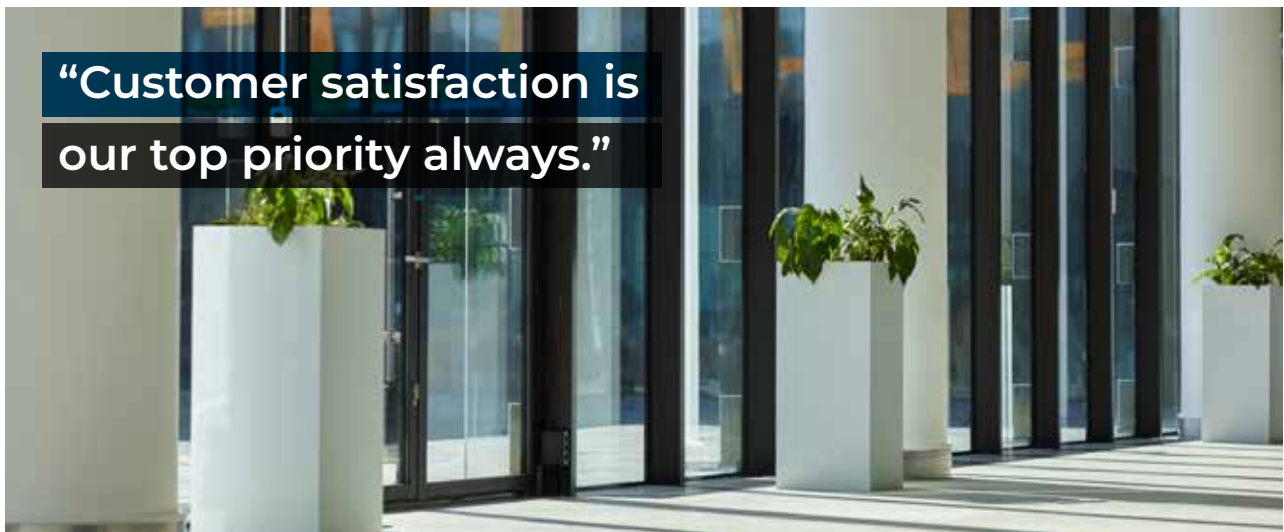

While primarily an automatic door & window service & product provider, we take on many projects outside of our usual remit, such as complete porch builds and shop front remodelling, to name a few. We encourage reaching out and sending across your project specifications to see if we're able to assist.

ALUMINIUM DOOR SYSTEMS

Our aluminium door systems are well suited to most organisations and commercial venues, with a wide opening specification, they provide easy access to any building, ensuring your premises meet the requirements of the Disability Discrimination Act. They are also extremely flexible and can be used for internal and external doors, as well as being integrated into almost any building or entrance. Bespoke design and powder coated to any RAL colour, our aluminium doors can match your branding and are guaranteed to improve the aesthetics of your building.

THE PROCESS

Our in-house fabricators are also skilled door engineers, which uniquely positions them to understand the entire installation process intimately. This dual expertise ensures that every door is crafted with precision, taking into account the specific requirements for seamless installation. By knowing exactly how the doors will be installed, our fabricators can design and construct each door to perfection, ensuring a flawless fit and function. This meticulous attention to detail means that our doors can be installed without any disruption, guaranteeing a perfect finish that meets the highest standards of quality and performance.

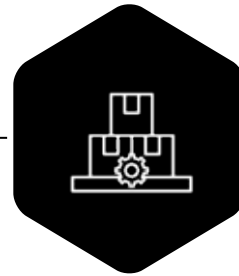

Order Confirmation

Once your order has been placed, our team will review and confirm all of the details with you. This includes verifying specifications, finishes, and any special requirements.

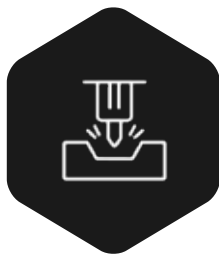

Material Procurement

Upon order confirmation, we promptly begin procuring the highest quality materials required for your project. Our strong relationships with trusted suppliers ensure that we obtain the best aluminium and other components.

Fabrication / Manufacture

With materials in hand, our skilled fabricators start the precise manufacturing process. Utilising advanced techniques and state-of-the-art equipment, we meticulously craft each door to your exact specifications.

Installation / Delivery

Once fabrication is complete, we coordinate with you to schedule a suitable date for installation. If installation is not required, we will arrange delivery with a dedicated courier to your required location.

AUTOMATIC SLIDING DOORS

Automatic sliding doors offer convenience and efficiency for businesses and buildings by eliminating the need for manual operation. These doors can be activated by motion sensors, push buttons or card readers, making them accessible for people with disabilities or those carrying items.

The different options you can choose from.

Automatic sliding doors can come in a range of configurations, including bi-parting sliding doors, all-glass sliding doors, telescopic sliding doors, and bi-parting doors. All of these options have their own benefits and are all best in certain environments, however, we will always advise what type of door we believe will suit your site conditions better and talk you through the options and benefits of each.

TECH SUPPORT

5YR

GUARANTEE

100%

RECYCLABLE

Since our beginning of time, we have successfully installed over 2500+ aluminium doors for multiple clients in a variety of industries.

Post-installation we offer 24/7 support. Whether you're having issues with controlling the system or would like to change certain aspects.

All of our aluminium sliding windows come with a 5 year warranty. 10 year powder coating warranty and 12 month installation guarantee.

Every bar of aluminium that we use and stock is 100% recyclable and has already been recycled. Ensuring we play our environmental part.

Our team of door experts are here to help! Whether you're looking for advice on selecting the perfect door, need assistance with installation, or have any other enquiries, feel free to reach out to us. We pride ourselves on providing exceptional customer service and expertise at every stage of your project. From helping you choose the ideal door to match your aesthetic and functional requirements, to ensuring seamless and efficient installation, our knowledgeable professionals are dedicated to making the process as smooth and hassle-free as possible.

BI-PARTING WITH OUR BEST SELLER

Our automatic bi-parting sliding doors, crafted from high-quality aluminium, are designed to be hard-wearing and exceptionally durable, making them ideal for demanding environments. These doors require minimal maintenance, allowing for hassle-free operation over long periods. Available in a wide range of colours, they can be customised to match any architectural preference.

THE BENEFITS

Operator Features

- Exceptionally quiet.
- Quality performance.
- The drive unit can be fitted to the lintel, free-standing or integrated in the ceiling.
- Precision made components and perfect matching of materials.
- Interactive communication between components that monitor and enhance performance, safety, and security.
- Self-learning processor with active automatic adjustment provides optimum operation.
- Menu-lead navigation.
- Full diagnostics and programming capability
- Fulfils 2006 / 42 / EG industrial guidelines for machines, DIN 18650 and all other relevant standards.

AUTOMATIC & MANUAL SWING DOORS

DID YOU KNOW?

We also offer window film solutions for all glazing products. Whether you want to tackle glare and heat from the sun or block out prying eyes with privacy film, we have the solution! Get in touch today.

OUR SOLUTION OFFERS

The perfect solution for environments such as schools, hotels, offices, hospitals, and any type of private or public accessible building which requires an internal or external swing door.

Although manual doors are a reliable option, they often get left open, leading to energy loss by allowing warm air in the summer and cold air in the winter to escape or enter. Automating these doors ensures they stay open when in use and remain closed when not, also further helping to conserve energy. Our solutions offer the flexibility to either install new automatic doors or modify existing doors to become automatic.

- Extremely low maintenance, although an annual service is recommended.

- They are simple, quick, and easy to install which minimises disruptions.

- These systems are long lasting and reliable, regardless if the doors are new or modified.

- Available in a wide range of finishes and can be powder coated to any RAL colour.

SWING DOOR OPERATORS

We are committed to providing our clients with the highest quality swing door operators available on the market. By partnering with leading manufacturers known for their innovation and reliability, we ensure that each operator meets our stringent standards for performance and durability. Our selection process is rigorous, focusing on cutting-edge technology, robust construction, and seamless functionality.

THE FEATURES

Operator Features

- DIN 18 650-compliant technology which is approved worldwide.
- Adjustable spring force gives it great versatility.
- Adjustable to accommodate customer-specific settings.
- Optimum power deployment in full swing areas.
- The opening stop is integrated into the door drive system (no hazard for pedestrians to stumble over).
- No emergency power supply required to open the door.
- Practically silent in operation.

STEEL DOORS

Transforming spaces is at the heart of what we do, and we do exceptionally well in enhancing security and making a statement. Offering bespoke, internal and external steel doors that ensure security for industrial, commercial, public sector, and residential buildings with purpose built steel doors.

OUR STEEL DOOR BENEFITS

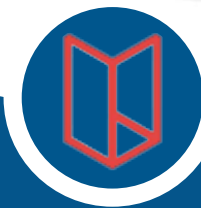

- Enhanced security and extremely durable steel metal.
- Low maintenance and is highly weather resistant.
- A cost effective solution that is also environmentally friendly.
- Is resistant to insects & pests causing damage.
- Provides great sound insulation & increases your property value.
- Is very versatile and can come as a Fire Rated door upon request.

Your Bespoke Solution

Colour & Finish: Our steel doors can be polyester powder coated in any BS or RAL colour of your choice, and are also available in stainless steel, with brushed, polished, and patterned finishes.

Use Case: The versatility of our steel doors mean that they can be configured for use as both personnel doors and emergency exits. The single, double, leaf, and half door-sets can also be supplied with bespoke side and over panels.

Additional Extras: Available additional extras on your steel door can include fixed, glazed, louvred or detachable panels.

Manufactured by
Metador

DEFENDER DECORGUARD

The Defender Decorguard features decorative grooves seamlessly integrated into the door skin using cutting-edge CNC technology and advanced tooling. Our bespoke solution allows you to choose from various preconfigured designs or collaborate with our Design Team to create a unique design tailored to your preferences.

This doorset is available with a wide range of security hardware options, including electronic locking and it has been tested to meet PAS24 standards. Vision panels with clear, obscure, or patterned glass can also be incorporated.

Explore our selection of special powder coatings, which include pearlescent and multi-colour finishes, textured surfaces, and metallic and stone effects, to achieve the ultimate designer doorset.

DECORGUARD PATTERN DESIGNS

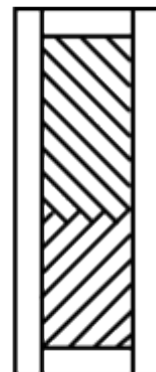

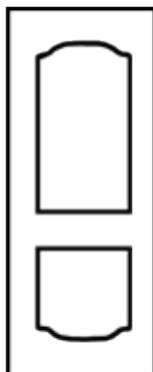

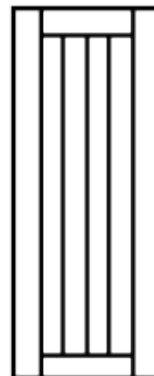

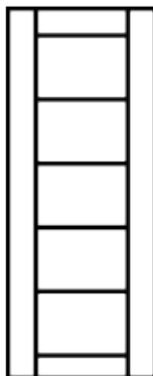

DECORGUARD

Available in either the designs shown or a bespoke design. Please get in touch to see if we can create what you require.

100% 

Satisfaction! We pride ourselves on ensuring that you're 100% satisfied with your order and product(s)!

FIRE DOORS & FRAMES

We manufacture bespoke fire doors, frames and screens in a wide range of materials and finishes that comply to British Standards. Our core values are to deliver exceptional and consistent quality, both in product and service, through providing both express and standard delivery options. Our philosophy is always to meet and exceed our clients expectations.

We install and delivery Nationwide!

We cater to both installation and supply only needs, ensuring our products meet stringent safety standards. With a commitment to nationwide service, we deliver our fire doors and frames promptly and efficiently, no matter where you're located.

Our expert team are dedicated to supporting your safety requirements with reliable products and exceptional service. Please do get in touch for a free tailored quote.

IMPORTANT INFORMATION

- From 30 minutes fire resistance (integrity)
- Certified glazing (insulating/ non insulating)
- Available as pre-hung assembly
- Must be installed by a competent person
- 44mm certified core to BS 476 Pt22:1987 or BS EN 1634-1:2014
- Kitchen doors, riser cupboards and gas cupboards must be FD60 or above
- 2-storey homes with a door leading from internal garage to house must be fire rated
- Habitable rooms in a new build or renovated property within 3 stories must be fire rated

SUPERB FIRE RESISTANCE

Our fire doors are crafted using state of the art materials that offer superior fire resistance. They are tested and certified to meet or exceed industry standards, ensuring your safety in case of a fire emergency.

DURABILITY & LONGEVITY

Engineered for longevity, our fire doors are built to withstand the test of time. High quality construction materials ensure durability, making them a reliable investment for your property.

CUSTOMISABLE OPTIONS

Who says safety can't be stylish? Our fire doors come in a variety of designs, finishes, and sizes to seamlessly integrate with your interior decor. Choose from our catalogue or collaborate with our design team to create a custom look.

FIRE DOOR RATINGS AND FINISHES

FD30, FD60, FD90, and FD120 fire doors offer 30, 60, 90, and 120 minutes of fire resistance (integrity) respectively. FD30 fire doors feature a 44mm certified core, FD60 a 54mm certified core, FD90 a 60mm certified core, and FD120 a 64mm certified core, all meeting the standards of BS 476 pt22:1987 or BS EN 163401:2014. Each door is equipped with intumescent strips in either the frame or the door, but not both, and includes certified glazing (insulating or non-insulating). Additionally, all fire doors are available as pre-hung assemblies.

FIRE DOOR FINISHES

Veneer Facings

Our high quality veneers are matched and assembled by expert craftsmen across a range of timber species.

Glazing Options

Glazed screens can be made in a variety of styles using appropriate glass types and thicknesses to meet the required integrity and insulation. Fire rated glass can either be Georgian Wired or Pyro (please note that Pyro is more expensive).

Paint Options

Your door can be painted any colour of your choice. This option means that you might have to touch up the paint work from time to time. Ensuring to match the coloured doors RAL colour.

Laminate Facings

Choose from our stock range of laminates or we can source any laminate of your choice. Laminates offer a tough and easy to clean surface with no maintenance.

FIRE RATED VS FIRE CERTIFIED

Unsure as to whether your doors are fire door compliant? Get in touch with our dedicated sales team today to book in your fire door survey. We're BM Trada Qualified which is the highest, most accepted fire door industry certification in the U.K.

WHAT'S THE DIFFERENCE?

When it comes to fire rated vs fire certified doors, confusion creeps in and catches a lot of people out. But which one do you need? Well, this would depend on the fire risk assessment for the building. This can also be an insurance related requirement, but its important to note that many insurance brokers are not aware of the differences between fire rated and fire certified entrances.

We would like to express the importance of the following information, it's critical to remember that first and foremost, fire doors are a life saving device and that when required, they're 100% effective.

Fire Rated Doors

Fire rated doors are a door that has been put together with fire resistant components and hardware, however, as a complete door it has not been put through a laboratory condition burn test. Therefore, nobody knows how it will withstand a fire. It also does not have any type of certification indicating its performance expectations and results. The confusion that lies with a lot of people is that they think because they have a "fire rated door", that regulations have been met and the doors comply, truth is, majority of the time they do not comply. So, unless the manufacturer of that door can prove certification, chances are the door does not comply.

Fire Certified Doors

Fire certified doors require the door and the frame to come from the same manufacturer who have put both of them, and the hardware on the door, in a laboratory condition burn test. These doors will then come with a physical certificate directly from the supplier to state its approval. However, compliance isn't just about the door and frame; they must also be installed correctly in order to comply with regulations. So even with a fire certified door installed, if the frame has been installed incorrectly, it will render the whole door and frame installation and be much less effective. It's important to contract a competent person or company to conduct fire door works, ensuring they have the correct certifications like BM Trada.

FIRE DOOR SURVEYS

Ensure your fire door compliance.

FIRE DOOR INSPECTIONS

During our inspections we ensure that your fire door, door frame and hardware are compliant with up-to-date regulations to certify compliance. Our fire door surveys are carried out to BM Trada Standards who are the leading Fire Regulation Certification Body and is the only accreditation service that is accepted by Government and MOD.

One of our accredited experts will attend site and complete a full inspection of each fire door whilst completing a checklist for each individual door. Identification labels will be fixed to each door to easily identify each door surveyed and will be linked to the final report.

POST INSPECTION

After our thorough in-depth assessment of each individual door, a detailed and comprehensive report is written that outlines the condition of each door and provides a summary of what is required to ensure everything is compliant.

We will then provide a quote to rectify any identified issues, if any. Quite often, your fire risk assessment for the building will need to be referred back to so it's a great help if you can send it to us in advance, along with a building floor plan, so that we can give a refined solution.

FIRE DOOR REQUIREMENTS

1. It is recommended that fire doors have 3 sets of hinges for each door leaf to maintain the integrity of the door due to its weight. These door hinges must be fire rated.
2. Glazing with a fire door must be fire resistant.
3. The gap between the door and frame should be 2-4mm.
4. Fire doors should be fitted with signs on both sides of the door, especially if they are a set of two doors.
5. Fire doors should all be fitted with a fire door closer.
6. The fire door frame should have the same rating as the fire door, ideally they would be purchased together to ensure this.
7. Intumescent strips and cold smoke seals should be fitted to the top and sides of all door leaves to prevent the spread of smoke and fire.
8. A fire door retainer such as Dorgard can be fitted to legally 'hold' open the fire door.

INTERNAL DOORS

Our long lasting relationship with suppliers has allowed us to be a stockist and retailer for all the importers and therefore, are able to supply the general public and trade customers with any item shown on their website. We supply doors from the below manufacturers, and if you find something on their website that is not listed on ours, please give us a call or email and we will be able to supply the product(s) for you. Due to the quantity of products available, it is not always possible to list everything.

OUR DOOR SHOP

Reasons we're not your typical door shop.

30+ Years Experience

We have over 30 years experience in supplying, installing, and repairing internal and external doors.

Leading UK Distributor

We are proud to be apart of the UK's leading retailers for premium internal and external doors.

Our Certifications

All of our products have undergone rigorous testing and our doors hold certifications from Certifire, BM Trada Q Mark and PAS24.

Natural Grain

All of our oak / walnut doors have been carefully selected and chosen veneers, ensuring you get the best of the best material.

Our Manufacturers

We only work with the leading manufacturers to ensure you're brought the top end products that are manufactured within their own product facilities.

Quality Control

Our quality control processes ensure provision of the highest quality products to be made available and delivered.

Hand Picked Veneers

All of our doors are crafted using specially selected veneers from all over the world.

In-House Glazing

Our suppliers have in-house glazing facilities, meaning you save time by not having the hassle of finding a glazing company to obtain your glass.

Bespoke Orders

We do our best to accommodate all bespoke requirements with our design team and suppliers.

COMPOSITE FRONT DOORS

To showcase the superior thermal resistance of our doors compared to other suppliers, TÜV Rheinland where commissioned to conduct rigorous thermal tests. If you're unaware of who TÜV Rheinland are, they are a reputable European testing certifier. The results clearly demonstrate that our 70mm doors outperform alternatives like hollow monocoque doors by nearly seven times.

This remarkable improvement not only provides a more comfortable and cozy environment, but also results in significant savings on your annual heating bills.

Our 70mm doors outperform a hollow monocoque door!

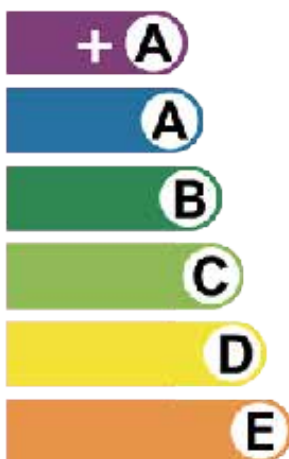

- Triple glazing with gas filled spaces
- Super insulating Thermafill* Core
- Door and frame set are 98mm thick
- Double sealed rebate creates an internal secondary seal

OUR A++ DOORS SAVE YOU MONEY

When you compare the door to a PVC door or timber core door, the A++ door is proven to save you money over the life cycle of the door.

How can we offer A++ doors?

The high strength, reinforced polyurethane core provides excellent insulation against the worst of mother nature's chills.

This double rebated twin-seal construction is virtually airtight by creating an internal secondary seal.

Along with the 70mm super strong core, glass elements are triple glazed for extra insulation. We even gas fill them for extra performance.

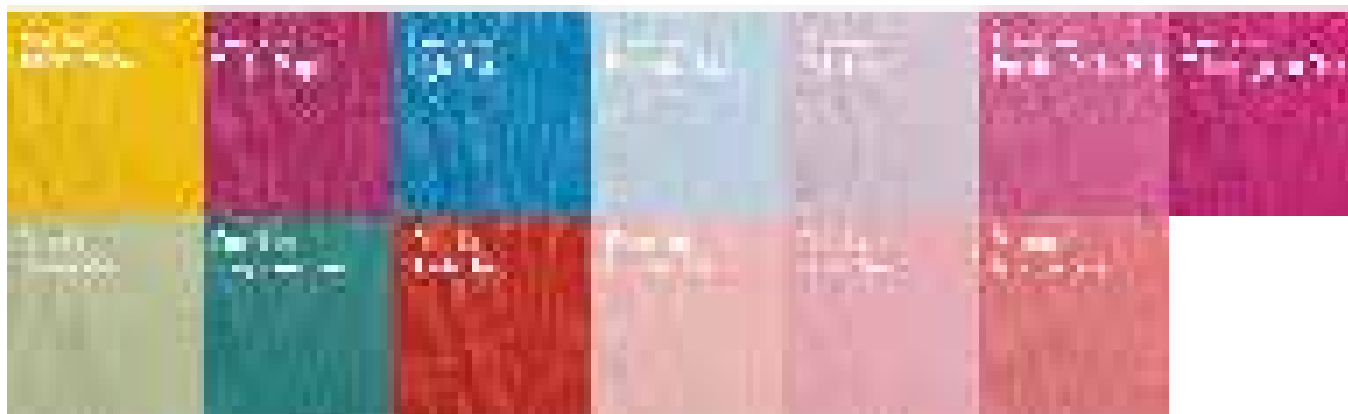

The unique multi-chamber, steel reinforced construction is an awesome insulator - keeping cold weather outside where it belongs!

A++ doors are an optional upgrade. To achieve A++, a sheet of low emissivity, energy saving Low E Glass unit has to be installed. Decorative glass is available in the middle however it's important to note that obscure glass is not available with A++ doors.

Standard Colours

Premium Colours

LOW DUTY SERVING WINDOW

Our Low Duty Serving Window is the ideal solution for accessible transfer between two rooms on an adhoc basis. For use in a home, such as transfer between the kitchen and living room, this window is perfect, but for heavier use environments such as receptions or warehouses, our Medium Duty Serving Window option would be more suitable.

With a simple two channel track across threshold and an overhead, the Low Duty Serving Window can fit within any clean level opening. The sliding glass panels are finished with a polished edge, however, have no frame on the horizontal sides.

Another feature which allows the window to fit into a lot of modern designs, is the minimal frame requirements. Due to it being designed for low use, it has been manufactured with minimal components which gives it a more sleek and cleaner aesthetic look.

The glass comes standard as toughened but can be laminated for extra safety. It can also be supplied with or without an additional timber frame along the sandblasted finger holes.

Additional Information

1

The track system is only available in silver anodised, a coloured channel and track is not available.

2

There is no draft seal between the panels, meaning sound can travel through easily.

3

The window is for internal use only.

4

It is not thermally broken, meaning heat/ cold can transfer through very easily.

5

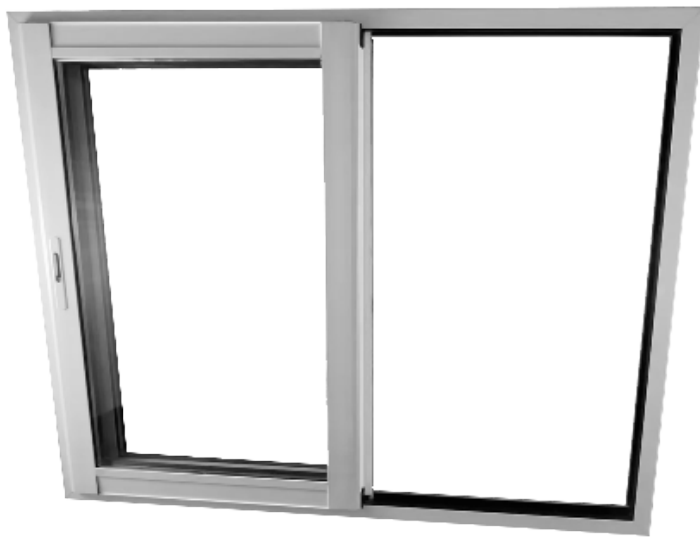

Both windows can slide but they are not automatically locked when in position.

6

The window is available with a manual locking system or without a manual locking system.

MEDIUM DUTY SERVING WINDOW

These windows can seamlessly integrate into the building facade or be housed within their dedicated booths. They can withstand a heavy amount of daily use and are the perfect solution for Receptions, Labs, Kitchens, Warehouses, and many more environments that would require interaction between two rooms.

Product Features

1

The double glazed units ensure insulation and a remarkable reduction in external noise.

2

It's thermally broken, preventing the transfer of heat, and minimising the thermal conductivity.

3

Built-in lock handles provide an extra layer of protection and a hassle-free process for securing the window.

4

Both panes slide by default, but can be configured as a single slider or even bi-parting.

5

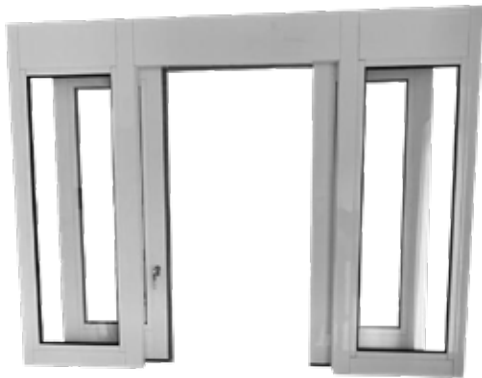

Can be powder coated to any RAL colour of your choice.

6

Is fully customisable with additional handles, locks, and even integrated blinds within the glazing.

HEAVY DUTY SERVING WINDOW

With our 20 years experience in designing, manufacturing, and installing serving windows, we've gain the trust of many household names and integrated our Heavy Duty Serving Windows into their premises. These include the likes of McDonalds, KFC, Five Guys, Costa, Zizi's, and many more.

Our resilient and adaptable Heavy Duty Serving Window is a definitive solution catering to your serving requirements in various environments, be it internal or external. Custom-engineered and meticulously crafted to meet your exact specifications, these windows are designed to endure rigorous usage while offering seamless operation.

Product Features

- Can be single or double glazed glass
- Can be powder coated to any RAL colour
- Custom sliding mechanism - single sliding or bi-parting configuration
- Automated operation system can be implemented for hands free use
- Extremely durable for heavy use environments
- Fully customisable

INTEGRATED WITHIN A DRIVE THRU

Increased Service Speed

Better windows to operate without stiff and awkwardness. Also savings on energy costs as windows will close when not in use.

Hygiene Standards

No more grubby hands constantly opening and closing the window!

Adjustable Serving Opening

Completely custom made to suit your building requirements.

Panoramic View

You get a better view of cars and outside activity, framless corners as an option give a lighter, brighter overall appearance.

Counter Space

Inside stainless steel or aluminium counter space, allowing for computers, cash registers and much more.

Quality Construction

Anodised or polyester powder coated aluminium extrusions and safety glass combine to give you an attractive window that will not corrode. Can also be marine grade powder coated.

Manifestations

MANIFESTATIONS

Ultrastop - the window film side of Next Doors Ltd, offering a comprehensive solution for a diverse array of needs; from enhancing privacy and security, to creating visually sunning decorative elements, we deliver window films that are unmatched against performance.

Full height glass in windows, partitions and doors require glass manifestations to make sure that it is apparent, which helps to prevent potential accidents. The Building Regulations 2000 Part M states that glass entrance doors and glass screens will satisfy requirements M1 or M2 if:

- a) They are clearly defined with glass manifestations on the glass at two levels, between 850mm - 1000mm and between 1400mm - 1600mm above the floor, contrasting visually with the background seen through the glass (both inside and out) in all lighting conditions.
- b) Manifestations take the form of a logo or sign at least 150mm high (repeated if on a glazed screen), or a decorative feature, such as broken lines or continuous bands, at least 50mm high.

Manifestations

If you're looking for custom manifestations such as using your logo, or have a custom graphic/ shape, we have an in-house design team who can bring your creativeness to life. Get in touch with our sale team today!

Dot Manifestations

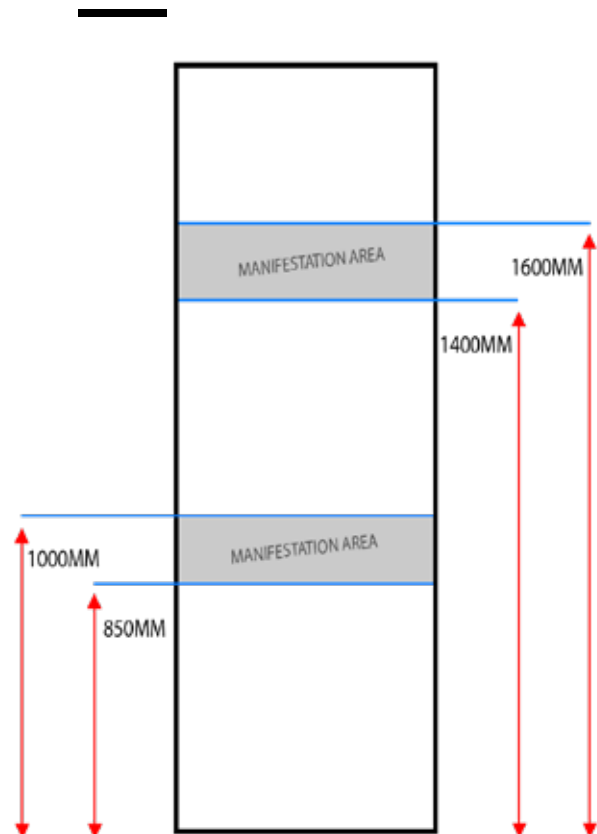

Square Manifestations

Logo Manifestations

Glass Manifestation Regulations

ACCESS CONTROL

Access control gives you the ability to regulate who or what is allowed to enter or exit a specific area. This is typically achieved through the use of security systems such as keycard readers and other door entry access controls. By having a security system like this in place, it provides a wide range of benefits including improved security, increased efficiency and enhanced data management.

With access control, you can control who has access to sensitive areas, monitor movements within a building and manage access permissions for different levels of personnel. Companies can ensure that their facilities and assets are well protected, while also improving the overall safety and security of their employees, customers and if residential, tenants.

Benefits of Access Control

- Enhanced Security
- Customisation & Flexibility
- Increased Safety
- Cost Savings
- Audit Trails & Reporting
- Remote Access Management
- Easy Integration
- Compliance & Regulations

INSTALLATION SERVICES

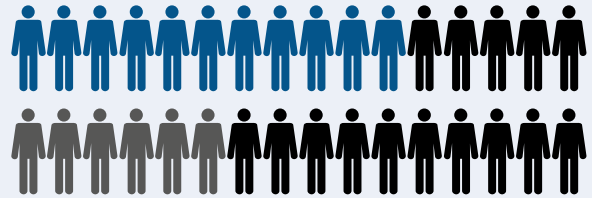

A professional and reliable installation is essential for various reasons, ensuring that the product or system operates optimally and safely. Our professional engineers possess the expertise and experience to navigate complex installation processes, minimising the risk of errors or complications that may arise from DIY attempts.

We Guarantee not 50, not 75, but 100% Satisfaction!

50%

75%

100%

Our Promise

Guaranteeing 100% satisfaction with all of our services is a top priority for us. We understand that a door, window or additional hardware is not just a function component but also an important aspect of your home or business.

Our team of experts will work closely with you to ensure that your installation is completed to your exact specifications and that it meets your unique needs and requirements. From the initial consultation to the final installation, we will provide on-going support and communication to make sure that you are completely satisfied with the finished product.

If for any reason you are not satisfied, we will ensure we do everything we can to make things right.

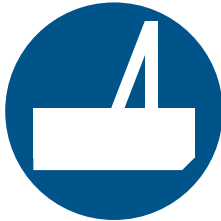

Your satisfaction is our top priority and we are committed to delivering the highest quality service, every time.

Next Doors Ltd employs ADSA authorised technicians (Automatic Door Suppliers' Association) for the inspection, supply and maintenance of Automatic Door systems as per the guidelines of EN16005 (formerly BS7036:1996 - Code of Practice for safety at powered doors for pedestrian use).

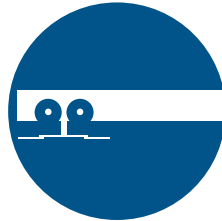

AUTOMATIC DOOR SERVICING

As leaders in the industry, we take pride in our comprehensive servicing solutions for a wide array of door systems. From automatic doors to drive-thru windows, sliding doors and fire doors, we specialise in the meticulous maintenance and optimisation of every door type. Our team of seasoned professionals bring unparalleled knowledge and proficiency to ensure the longevity, safety and seamless functionality of your doors or windows.

Door Operator

All accessible operator mountings, fixings and moving parts are checked for wear and tear. They will also be greased and tightened if required.

Running Track

General checks and cleaning of the running track will be carried out to ensure a smooth operation, the belt tension will also be adjusted as required.

Pocket Door

The safety pocket door locking will be checked and realigned if required as well as checked over for general wear and tear.

Adjustments

Should you wish for the opening/ closing speed, clear opening or sensor activation to be adjusted, our engineer can complete these works free of charge whilst completing the service.

General Cleansing

General cleansing will be carried out for the whole mechanical side of your sliding door/ window and moving parts will be greased if required.

Comprehensive Report

A comprehensive report is then written after our engineer has concluded the service. This report will then be sent to you the same day or within 24 hours. If additional works are required, we will note that down and also provide you with a free quote.

ENSURING YOUR COMPLIANCE

Mechanical doors, like any piece of moving mechanical equipment falls under the 2008 Machinery Directive. This basically states that the machine (in this case the automatic door) should be routinely maintained on an on-going frequent basis. Book your annual service today - 01322 663 106

So to ensure you're staying compliant, make sure to book in your annual service. If you're situated in a busy environment, think about making it every 6 months instead of 12.

24 HOUR EMERGENCY ASSISTANCE

Whether a non emergency or an emergency, our team of engineers are on hand and available around the clock 24/7. Our nationwide service takes us all of the U.K. and we do our up-most best to fix all issues on site with stock items on our vans, saving you an additional return labour charge!

BEST COMPANY
2024

OUR CORE VALUES

We are a company that have many core values and ensure we stick and stand by them. Below, we've shared our most important!

LEARN AND BE CURIOUS

We are very clear on the goals we set to achieve, and nothing less than achieve we will ensure. We all know that sometimes plans do work out the way we want them too, but that doesn't mean give up. It means you have to reach the destination using a different path, no matter how long, no matter how tough, nothing worth while is an easy ride.

Development is something that we encourage profusely. There is no such thing as too many questions, and that's why our staff are well equipped with multi-situational skills!

IF THE PLAN DOESN'T WORK, CHANGE THE PLAN NOT THE GOAL

TREAT CUSTOMERS BUSINESSES/ PREMISES LIKE IT'S YOUR OWN

Being a family business, we understand the importance of customer service, not only just in the office, but also out in the field. Our engineers are encouraged to treat customers businesses and premises as if they were their own, meaning, if you complete a job, would you accept it on the other end how it has been left. If the answer is no, then rectify the issue(s) and don't leave until you have!

Team Work Makes The Dream Work

Nothing great has ever been achieved by a single being. Combining diverse strengths and perspectives, allowing people to achieve more together than alone.

Collaboration fosters creativity, boosts morale, and helps overcome challenges,

The Difference Between Ordinary & Extraordinary Is That Little Extra

That little extra, the extra effort, attention to detail, and commitment to excellence. It's the willingness to go beyond what's expected, to push boundaries, and to consistently deliver more than what is required.

Say It As It Is And Be Responsible For Your Words, Actions & Results

Embrace the honesty and accountability in all interactions. It's about speaking truthfully, even when it's difficult, and owning the impact of what you say and do. Fostering trust and integrity, ensuring that commitments are followed through and held accountable.
